SDKs

We provide two well-supported SDKs:

[TypeScript](#)

[For web developers](#)

[Golang](#)

[For engineers](#)

Frameworks

SUAVE works well with Forge, as our tutorials illustrate. If you need something more, or prefer other frameworks, you can explore the below:

[SUAVE Foundry](#)

[Not just Forge, but all the bells and whistles.](#)

[SUAVE Ethers](#)

[For those who prefer Ethers to Viem.](#)

[SUAVE Playground](#)

[An example using SUAVE with Hardhat.](#)

UI Templates

[Vite](#)

[Only typescript.](#)

[Next TS](#)

[Typescript with Next + React](#)

e2e SUAPP Examples

[Private Orderflow Auction](#)

[Keeping things confidential.](#)

[Build Eth L1 Block](#)

[Building blocks, the decentralized way.](#)

Community Applications

[SUIFT](#)

[Only true fans get concert tickets.](#)

[So-Extra](#)

[Extra data auctions on SUAVE.](#)

[TLDR Research](#)

[Towards a Uni v3 AMM with no _____ and less LVR.](#)

[Unisuapp](#)

[Solver-driven intent executions on Uni v2.](#)

[Arena X](#)

[Minimize MEV while using Uniswap's Universal Router on any chain.](#)

[Casino](#)

[Feeling lucky?](#)
