

July 2023

customized refunds

Configure the percent(s) and recipient(s) for MEV-Share refunds by adding the [refund](#) query parameter to Protect RPC requests or by adding `preferences.validity.refund` argument to the `eth_sendPrivateTransaction` JSON-RPC [method](#).

builder sharing

Share transactions and bundles with additional builders for faster inclusion.

- Users: [Opt in to share with registered builders](#)
- Builders: [Register to receive bundles](#)

debugging guide

Follow this [guide](#) for debugging bundles as a searcher on MEV-Share.

simple-limit-order-bot

New tutorial for searching on MEV-Share, using a simple limit order bot as an example.

- [Step by step tutorial with full code examples](#)
- [Open source bot repository](#)

eth_sendPrivateRawTransaction

- [eth_sendPrivateRawTransaction](#) is now supported on relay endpoint. Its behavior is identical to `eth_sendPrivateTransaction` but its format is similar to `eth_sendRawTransaction`.
