default logs hint

A new hint which shares a subset of logs, as described in the [stable configuration](#).

Previously these logs were shared by default. Now, users of the private transaction API, Protect RPC, and bundle relay can also request to share these logs when customizing their settings.

simple-limit-order-bot

New tutorial for searching on MEV-Share, using a flashloan arbitrage bot as an example.

SSE stability updates

Made several improvements to the SSE stream endpoint to reduce client timeouts and hanging connections. The SSE stream now scales better under dynamic workloads and can handle a greater number of client connections.
