Random

Random is a library with utilities to generate random data.

Functions

randomUint8

Generate a random uint8 number.

Output:

• value (uint8): Is the random number.

randomUint16

Generate a random uint16 number.

Output:

• value (uint16): Is the random number.

randomUint32

Generate a random uint32 number.

Output:

• value (uint32): Is the random number.

randomUint64

Generate a random uint64 number.

Output:

• value (uint64): Is the random number.

randomUint128

Generate a random uint128 number.

Output:

• value (uint128): Is the random number.

randomUint256

Generate a random uint256 number.

Output:

• value (uint256): Is the random number.
